COMSATS UNIVERSITY

2017 – 2021

Bachelor of Science in Computer Science

KEY PROJECTS

TriPlanner – A smarter way to plan your trip | 2021

A web application to facilitate the tourists and to bridge the gap between tourists and businesses. Tourists can generate comprehensive trip plans based on multiple stops (destinations), add their friends into the plan, manage budget, and book rooms. On the other hand, hotels can automate the whole process of managing their hotel.

Technologies: JavaScript, React JS, Express JS, MongoDB, Google Maps Platform, HTML, CSS, and Material UI.

Taskoo | 2020

A freelancing website designed for a client where users can offer and purchase services/tasks in a wide range of categories.

Technologies & Tools: JavaScript, React JS, HTML, CSS, React Ant, and APIs Integration.

Portfolio Website | 2020

My own portfolio website to display my web design and graphic design projects.

Technologies: JavaScript, React JS, HTML, CSS, and SASS.

WORK HISTORY

FIVERR

2015 - 2020
